WEDDING

MORRELL-MCMURRAY

A pretty wedding was quietly solemnized at the home of Mr. and Mrs. Charles McMurray, on Friday, June 30, when their daughter Lillie May, became the bride of Mr. Francis Arthur Morrell, youngest son of Mr. and Mrs. W. Morrell. The ceremony took place in a grove of trees on the farm of the bride's parents at 5:30 o'clock in the afternoon, Rev. E. F. Kemp of Oyen, officiating.

The bride, who was attended by her sister Miss Opal McMurray, was dressed in ankle length coral pink sundown crepe and a large brimmed hand woven hat, and wore sea sand colored pumps and hose. She carried a bouquet of pink and white carnations and lily of the valley. The bridesmaid was dressed in ankle length green pastel crinkle crepe and wore black pumps and flesh hose. Mr. Wm. M. Thompson of Calgary supported the bridegroom as best man.

Following the ceremony the guests sat at a wedding supper, a feature of which was the lovely wedding cake made by Mrs. W. D. Morrell. Later in the evening, a dance was held in honor of newly wedded couple, at Nobalta school.

Mr. and Mrs. Frank Morrell left on Saturday morning for Edmonton, where they will spend their honeymoon. The good wishes of the community are extended to this popular young couple for their future success and happiness.

CARD OF THANKS

We desire to extend our sincere thanks to all for the sympathy extended in our bereavement.
Mr. and Mrs. H. C. Johnson
and family

Consolidating

Tax Arrears

For the purpose of encouraging property owners to liquidate any arrears of taxes, and also to give better opportunity to those whose lands may have passed under the tax recovery act, to regain title or at least protect their property from sale, the provisions of the new tax consolidation act, passed at last session of the legislature, have now been brought into effect, and may be taken advantage of. The act provides for arrears of taxes of more than a year's standing, namely the beginning of 1933, to be consolidated, and payments made in six annual instalments, each to be paid not later than December 15 in each year. The first instalment is to be ten per cent of the consolidated arrears, the second instalment ten per cent, the third 15 per cent, and the fourth 20 per cent, the fifth 20 per cent, and the sixth 25 per cent. Those wishing to avail themselves of the advantages of the act must apply in writing to the municipality before October 1. Owners of land whose taxes were consolidated under the acts of 1931 and 1932, may come under the new agreement by making application up to October 15. The instalments collected under the new system (Continued on page 1.)

OBITUARY

MILDRED E. JOHNSON

A funeral service for little Mildred Eileen Johnson, youngest daughter of Mr. and Mrs. Harvey C. Johnson of Oyen whose death occurred Sunday morning, July 2, 1933, was conducted on the lawn at the Johnson home on Monday, July 3, at 2 o'clock in the afternoon, and interment followed at Oyen cemetery. Rev. E. F. Kemp, officiating. During the service on the lawn, the hymn "Jesus Loves Me", a favorite of the little girl was sung.

Mildred Eileen Johnson was the third daughter of Mr. and Mrs. Harvey C. Johnson. She was born on December 8, 1926, and died following an illness of about five weeks from infantile paralysis. The funeral was largely attended. The following friends acted as pallbearers: Mr. T. W. A. Walker, Mr. Elmer MacArthur, Mr. W. M. Denton and Mr. J. J. Skinner.

Governor-General Visits Boys' Farm

The annual closing exercises of the Boys' Farm and Training School at Shawbridge, Que., were made memorable for the 150 boys of the institution recently when they were honored by the presence of the Earl of Heshborough, Governor-General of Canada, who addressed the school and gave out the prizes. Accompanied by E. W. Healy, K.C., chairman and president of the Canadian Pacific Railway, who is also president of the Boys' School, and a number of directors and well-wishers of the institution, His Excellency was the object of a great ovation by the boys on the arrival of the special train at the Farm. This is shown in top photograph of the lay-out. Lower left, the Governor-General is shown shaking hands with Major Ralph Wilcock, D.S.O., superintendent of the School, and at the right His Excellency is acknowledging the plaudits of the boys from the steps of the special train. It was the first time in the 15 years' existence of the School that a Governor-General of Canada had taken part in the closing exercises of the institution. His Excellency, addressing the School, stressed character: as being of vital importance to success in life.

Scientists Assert That Extremes Of High Temperatures Will Mark The Summer Of 1933

If vagaries of summer weather to date have not been sufficient to bring conviction that extremes of high temperature will mark the season, it may be added that science to the extent that it ventures opinions upon such subjects—agrees with the popular view that this summer is to be extraordinarily hot.

The reason given by the supposed experts, if accepted without too much critical examination, is fairly simple. We may expect a good number of hot spells, they declare, because less cold air is going to move in this direction than has arrived in other recent seasons. The full explanation is a trifle more involved.

Heat in any region is produced by three causes: the direct effect of sunlight; drift of hot air from place to place; and by the way air masses are warmed through the increase of pressure when descending from higher atmospheric levels. This third variety of heat is the same as that produced when air is compressed inside an automobile tire. The first extreme heat wave here this year, the meteorologists report, was caused by movement of air northward after it had become over-heated through such a process of descent and compression in the area about the Gulf of Mexico.

If we are to guess what future weather, though, we must return to consideration of the sun; for it, after all, not only generates heat but is the chief force in compressing air and moving it, whether cold or in a heated state. An interesting factor this year is that the sun is expected to generate an increased amount of heat, because the number of sunspots is on the increase and, contrary to what it may seem, the more sunspots there are on the sun the more heat it emits.

But this lead, to continue with the meteorologists' tale of contradictions, ordinarily brings cold weather in this area, for the warmth becomes transformed into solar energy, since the atmosphere and brings large gusts of cold northern air in this direction. Hence, however, the scientists say, time lag connected with this solar energy, since it works largely through the atmosphere in the case of weather conditions show a tendency to correspond with solar conditions of six or eight years ago. In the solar period which will control our weather this year, according to the scientists, the sun's activity is on the increase and, as a result, we are now in a time of decreasing atmospheric circulation. That means, if they are right, we are said to be the first place, less cold air is coming this way.

All of which, it is to be feared, leaves guessing about the summer as dangerous a game as in the past, even though the scientists, like the earlier weather prophets, who spoke in simpler terms, seem to agree that the secrets of nature are growing less and less secret to them. But if it is a hot summer, we are told, we will know it. Or the scientists did.—Toronto Evening Telegram.

Saskatchewan Butter

Creamery Butter Output During May Shows Increase

Creamery butter output in Saskatchewan during May shows an increase of 54,750 pounds over April according to figures released by the dairy branch of the department of agriculture for Saskatchewan. This is an increase of 29 per cent. As an indication of the return of the southern section of the province to its former position, May figures show a 10 per cent increase over the production figures for the same month last year.

For the first five months of the year the creameries reported a total butter make of 6,101,728 pounds, which is practically the same as the figures for the same period of 1932.

Old Rule Proved Wrong

The old rule that grain for pigs should not be ground too finely seems to have been dealt a severe jolt by recent findings of Professor Sinclair, as reported to the Alberta Farmers Field Day at the University of Alberta. Finely ground grain brought faster gains than either medium ground, coarse ground, or whole grains fed to pigs at Edmonton.

The upturn was inevitable. When people get their backs to the wall they begin to take things.

The latest definition of a go-getter is a fellow who runs the risk of losing three miles from a service station.

Radio Station Moved By Plane

All Northland Is Now Linked With Outside World

An entire radio station and all its delicate equipment has been moved by air from Lindsay Bay to Cameron Bay by Royal Canadian Corps of Signals with the co-operation of the Canadian Airways.

The station, equipped with both short and long-wave apparatus, is functioning satisfactorily, it is stated. It is the first time on record such a feat has been accomplished.

Captain Stuart Hastings, commanding officer Royal Canadian Corps of Signals, announced every strategic commercial center in the northland is now in touch with the outside world.

Two standard radio stations, operated by the Dominion government at Fort Rae and Fort Chipewyan, have commenced operation.

China Gains Morale

Pride May Have Started Winding Of Chinese Unity

China has surprised the world and very likely herself by refusing to follow up the Japanese troops with a civil war of her own. Only a few weeks ago, when Tokyo's armies were sweeping over North China, people said that there would be no peace with Japan because no party in China could make such a peace and stand up against the wrath of the Chinese people. But the National Government signed a truce which seems to have found general acceptance in the country.

The hammer blows of the Japanese invader may thus have begun the winding of Chinese unity. Japan's policy of not warring with China is on the contention that China is not a nation but a riot. That charge may well have pierced through the crust of factional and personal selfishness to the core of Chinese pride.—New York Times.

Autogyro May Replace Observation Balloons

British Air Ministry Has Ordered One For Experiment

Observation balloons, the "saucers" and other types as familiar to Canadian troops in the war, today are possibly on the way to oblivion. The British Air Ministry has ordered one of the latest type wingless autogyro "windmill" aeroplanes for experimental use as a light landing for the balloon. It has been learned. Air ministry experts believe the autogyro will prove superior to the balloon for observation work because of its less vulnerability to attack and ability to resist attack or retire quickly in the face of a powerful hostile force. The type of autogyro has been selected for its experiment will have a crew of five. It will be equipped with wireless and machine guns.

Dean Inge To Retire

Gloomy Dean To Resign From St. Paul's On Account Of Advancing Years

Dr. William Inge, the so-called "Gloomy Dean" of St. Paul's since 1911, announced his intention to resign the position next summer on account of advancing years. He is 73 years old.

He intends to spend his retirement in the neighborhood of Oxford, where he is understood to be negotiating for a house.

From His Standpoint

When Mose was told that poor Hattie had been shot dead by Judge Hickie while he was stealing Judge Hickie's chickens, he merely replied: "Oh, well, it might have been worse."

"How could it have been worse?" indignantly asked the informant.

"Poor Hattie dead? De judge jist naturally houn he head right on him. What could be worse dan dat?"

"It might have been worse," replied Mose, "if de judge is off de gun de head off de judge, might have houn de head off de judge."

A Novel Proposal

Headlights on sheep is a novel proposal put forward by J. N. Corbett, Montana rancher. A few animals wearing goggles fitted with a flashlight battery and a red reflector on the lamp, he claims, will protect a band of several thousand sheep from sliding gulches and running cougars. He finds the light does not bother the sheep.

Peru has a new retail sales tax.

By Ruth Rogers

The main point with my always has been in getting somebody to do a job better than I could do it myself. I knew what I wanted, but I could not always accomplish it. The success of our organization has been due entirely to the people I have found.

The late Edward K. Bol, editor of the "Latter Home Journal," was probably as well known, if not more so, than his employer. It was he and not Cyrus H. K. Curtis who made that magazine. The personality of the men at the head of the editorial staffs is imprinted on the pages of the Curtis publications.

Unquestionably Mr. Curtis was a man of wonderful business instincts. He started in the newspaper line with a capital of three cents when he purchased the last three papers from a newsboy and sold them at the full price. With his six or nine cents he bought a few more papers next day and pyramided his earnings day by day until at length he decided he should start newspapers and magazines in life work. Probably he was more a business man than a journalist.

If his first business deal had been a banana he might have become a great fruit merchant.

The salient fact in his career, however, as he said himself, is that the picture man who could do certain jobs better than himself.

That is how lots of successful men succeed. Sometimes they recognize that fact in a material way—and sometimes they don't.—St. Thomas Times-Journal.

Left-Handed Children

Should Not Be Forced To Use Right Hand

Kettering education committee has forbidden its teachers to stop left-handed children from using the left hand for writing and other manual work. This has been done in consequence of a report by Dr. C. H. Hogg, the medical officer, whose attention has been directed to certain cases of stammering. The inquiries revealed that a number of these cases were left-handed children who had been converted to writing with their right hands.

He also cited cases showing that of 41 left-handed children who were compelled to use the right hand 24 became stammerers. In a further case 12 right-handed children were trained to use the left hand, and within five months all developed stammering.

What Fuzzed Him

He wanted him going down at their first-born. Obedience, admiration, rapture, incredulity, chased across his face the stole up and said, tenderly: "Tell me your thoughts, dear."

"How can they make that cot for fifteen shillings?"

Business is looking up to those who are looking it up.

He was a big, stocky fellow with a friendly smile, and he was well equipped for his job.

Publisher Picked Good Men

Cyrus H. K. Curtis Gave Employees Credit For His Success

Cyrus H. K. Curtis, Philadelphia publisher, who when he died was the publisher of prosperous newspapers and even more prosperous magazines having nation-wide sales running to the millions, ascribed his success to the men who worked for him. He once said:

"The main point with my always has been in getting somebody to do a job better than I could do it myself. I knew what I wanted, but I could not always accomplish it. The success of our organization has been due entirely to the people I have found."

The late Edward K. Bol, editor of the "Latter Home Journal," was probably as well known, if not more so, than his employer. It was he and not Cyrus H. K. Curtis who made that magazine. The personality of the men at the head of the editorial staffs is imprinted on the pages of the Curtis publications.

Theory Often Falls Down

Burglar Given Keys On Loan's Frown Was Soon Back

Modern penological theory believes that criminals in prison should be taught some useful occupation, and on their release be given back any tools they possessed, but here's a case where the theory fell down.

Frank Marzani was given back a bunch of various-sized keys when released from prison after being convicted of robbing apartment letter boxes. Now he is back for two years on the same charge after using the same keys.

"Where did you get them?" asked the judge.

"When I got out the officers gave them back to me," replied Marzani.

Insurance Men Will Not Be Insured

Ex-Service Men Peril Not Be Insured After August 31

The provision which ex-service men may make application for insurance under the provisions of the Returned Soldiers' Insurance Act expires on August 31, 1933, according to a bulletin issued to the Dominion Council of the Canadian Legion by J. R. Brown, general secretary at Ottawa.

Under the British Act provides for the Government making insurance contracts with any returned soldier residing in Canada or with any widow so domiciled and resident, for the payment of \$500 or any multiple thereof, but not exceeding \$5,000, in the event of death.

Injure Chilean Trade

British Restrictions Force Ranchers To Slaughter Sheep

British restrictions on meat importations have forced Chilean ranchers to slaughter 225,000 sheep from Canada, which is the only marketable product which they obtained was tallow.

Ordinarily almost all the sheep meat was used in the region of the United Kingdom from non-Empire sources were restricted in the Ottawa trade agreements.

Have Plenty To Host About

There is a village in Durham where the old folk proudly boast that if their ages were totalled together they would stretch back to the days when Adam was a lad. Shanty Bridge is the place where people live happy and long. It has only a few hundred inhabitants, but they include several ancient men and women of 80, 90, and 100 years of age.

They are looked upon as youngsters.

Competing With Apples

Consumption of apples in Canada does not show any great change, though slightly higher in the period 1928 to 1932 than in the preceding five years. There is growing competition from the banana and citrus fruits.

He was regarded by the Egyptians of 4,000 years ago as one of the most powerful medicines, declared European archaeologists.

London Conference Delegates Meet On Common Ground At World Garden Party

Women Stand Adversity Well

In Many Cases Depression Has Been Of Benefit To Them

Although depression has driven a great many men to insanity and nervous disorders, its effect on women has been largely beneficial, according to Dr. Karl M. Bowman, assistant professor of psychiatry at Harvard medical school.

"The effect, as far as nervous disorders are concerned," Dr. Bowman said, "has been much less the effect on many women during the war. They were used to sitting around idle and worrying about themselves, but once the war got under way they occupied themselves with Red Cross work and other activities and forgot their imaginary troubles."

"The depression has given them some something to do, and its effects have been a blessing to the idle rich type, who had too much money for their own good and nothing to occupy themselves."

"Men, on the other hand, have probably increased nervous disorders. Many have broken under the strain, but strange to say, the wives of men hit by adversity are, on the whole, not nearly so badly affected."

"A study of hospitals throughout the states revealed no increase in the number of women psychiatric cases since the depression, the greater number, in almost every hospital, being men."

All the world represented at a garden party setting. The speakers were on the ground of historic Windsor Castle. Hosts: His Britannic Majesty King George, his Gracious Queen and members of the Royal Family. "Among those present": Delegates from sixty-six countries, in attendance at the Economic Conference. More than 2,000 guests; many men of many minds, in formal attire; their ladies radiant in the bright raincoat of summer. A babel of tongues.

Never before has there been a social function of this unique nature. Never before was it possible. During recent weeks leading statesmen of a civilized world have been converging on London, "the heart of all creation, where the veins of commerce meet." They gathered on various business; to seek relief for a sorely afflicted world. They were greeted and welcomed by His Majesty the King; and after finding their bearings and getting down to work, His Majesty the King invited them to a week-end garden party.

That is the way they do things in hospitable England. Business is business; but there must be the week-end, the relaxation, the pleasure, the fun, the makes Jack a dull boy. But more things are accomplished during the week-end, at these gatherings and garden parties, than in the philosophy of people who do not know England and the English. And at this garden party in Windsor Castle grounds made and conducted as have been established that will mean much later on in the conference days.

Consider the nature of this assemblage of people. Each hemisphere was well represented. There were "men of the North" and "men of the South" and guests from the Orient. East met West. Also men from the Republics of the Americas. The guests were men and women from the Dominions of the British Empire. Guests from the old lands, from "regions" Canada, New Zealand, and the grounds were men and women with the easy polite development of the world's civilization, and through many centuries of Old World civilization, and guests from the newer countries who may have heard of the world's civilization.

"When I got out the officers gave them back to me," replied Marzani.

"How can they make that cot for fifteen shillings?"

INDIAN POLICY IS DEFENDED BY BADWIN

London, Eng.—Die-hard Conservatives met overwhelming defeat in their attack on the government's Indian policy at a specially convened meeting of the central Conservative council. More than 1,000 members attended.

Led by Winston Churchill, Lord Carson and Lord Lloyd, former governor of Bombay, the die-hard faction presented a resolution expressing "grave anxiety" over the administration's proposals for the government of India, but this met with a stormy reception. An amendment was finally adopted by a vote of 88 to 250 postponing any final conclusion on the question until the joint session of the Indian made its recommendations.

Stanley Baldwin, laid president of the council, defended the government's proposals. He was given a great reception. Some time ago, he stated Mr. Baldwin would stake his leadership of the party on the verdict of the gathering and his decision to participate invested the meeting with first-class importance.

He alluded to his reluctance to bring great imperils upon the party, and emphasized that regardless of rumors to the contrary, the white paper issued by government, embodying its plan for India, had the support of the entire cabinet. Winston Churchill, who accused Mr. Baldwin of inconsistency, was subjected to considerable interruption while Lord Carson, leaning heavily on his stick and evidently in pain, was given a wonderful reception.

Boat Rates For Wheat Low

Two Cents Per Bushel From Lakehead To Montreal

Ottawa, Ont.—The battle among the lake shipping interests is a factor in the present improved wheat situation, according to plans laid by the government department here. Boats are carrying wheat from the head of the lakes to Montreal at as low as two cents a bushel. This is the lowest rate statistical officials here can recall. Last fall the price was as high as 10 cents.

During last season an amendment was made to the coastal law limiting the business from the head of the lakes to Montreal to British owned boats, but it will only be brought in effect by proclamation and it is intimated here this will be delayed at least until Premier R. B. Bennett returns. Ocean rates are also down.

Leaves Soon For Antartic

Explored Regions Are Objective Of Lincoln Ellsworth

New York.—Lincoln Ellsworth told the Metropolitan club he had abandoned a summer visit to Switzerland in order to have more time for his southern expedition plans and would depart soon for New Zealand.

New Zealand will undergo a final conditioning period for an early fall start on the project that has the unexplored regions between the bay of Whales and the Fletcher ice shelf as its objective.

Unemployed Make Trouble

Vancouver, B.C.—A crowd of about 150 men broke into the unemployment relief office at Hamilton Hall, overturned registration files, tore out telephone connections, and defaced before police could reach the scene. Practically all records of single unemployed relief cases were destroyed. It took several days will be required to sort them out.

Island Disappears

Tokyo, Japan.—Ganges Island, shown on maps of the Pacific Ocean at 37 degrees north latitude, 154.10 degrees east longitude, has disappeared, according to Japanese naval surveys who have just completed an extensive hydrographic cruise.

On Welcome Committee

Ottawa, Ont.—The Dominion Government will be represented at the informal welcome to President Franklin D. Roosevelt, at Campo-Bello Island, N.B., by Hon. Murray MacLaren, Minister of Pensions and National Health.

Decides Not To Resign

Winnipeg, Man.—Hon. Albert Prentiss, former minister of agriculture in the Manitoba Government and at present minister without portfolio, has decided not to resign his seat in legislature or his position in the government.

W. N. 7, 2001

Relief From Drouth

Rains Over Wide Areas Greatly Relieve Situation

Ottawa, Ont.—At least temporary relief from drouth was provided over wide areas in the prairie provinces by rains during the past week. This was rendered more effective by moderate temperatures, according to the weekly telegraphic crop report issued by the Dominion Bureau of Statistics. The serious dangers from grasshoppers is emphasized.

Drouth has had a damaging effect on crop growth across the southern part of Canada from eastern Quebec to the Rockies. Heavy rainfall has greatly improved conditions in the Maritime provinces. Drouth prevails throughout Quebec, with growth of all crops retarded. Rain is urgently needed. Similar conditions prevail in Ontario, where the dry weather has adversely affected nearly all crops.

Grain producers in the prairie provinces are encountering many trials, particularly drouth, heat, hail, insects and disease. Grasshoppers are becoming migratory and seriously threaten the crops over large southern areas of the three provinces.

Drouth has accentuated the damage from drouth in Saskatchewan. During the past week, there were good rains in northern and central portions of the prairies which either maintained improved prospects, but further general precipitation is necessary.

Reports from the prairie provinces are more optimistic as a result of the clear, warm weather of the past fortnight.

Renewed Confidence

Advances In Commodity Prices Is Augury Of Better Times

Calgary, Alberta.—Recent advances in commodity prices were said by Premier J. E. Brownlee of Alberta to the renewed confidence of salaried men and women in the security of their jobs.

In Calgary attending the annual convention of the Union of Alberta Municipalities, the premier took time to express confidence in the early return of better economic conditions which he said was already evident.

"Thousands of our Canadian people are on salaries. When they lose confidence they do not spend freely. It is back in recent years by the salary of our people that business has been opened and that this influence will be felt throughout the Dominion for the future," he said.

Explaining a reference to a construction program, Mr. Brownlee said the government was now conducting a policy of "useful public works" which might be done in the province. "The whole question of work which the government is now considering will be to increase confidence in various provincial institutions," he said.

"If we can find the money, such activity of useful public works will be undertaken. It is now beginning to open up to the public in the west."

Will Protect Farmers

From Crop Seizures

Saskatchewan Debt Adjustment Commission Completes Plans

Regina, Sask.—Plans for the protection of farmers against undue pressure from creditors have been completed by the Saskatchewan Debt Adjustment commission.

After farmers who adopt the plan laid down by the board have filled in the necessary form provided the board will arrange:

(1) That no seizure of the crop will be made by sheriffs to pay off judgments, etc.

(2) That creditors will not be allowed to seize.

(3) That farm implements will be retained.

(4) That title to land will not pass to the tax sale purchaser.

An outline of this plan is being forwarded to farmers in Saskatchewan by the debt adjustment board in the form of a circular letter.

U.S. Wheat Tax

Washington, 8.—Administrators of the United States Farm Act plan to levy a 30-cent a bushel processing tax on wheat exports to the United States in grain price. The administrators hope to place the levy into effect early next month, probably July 8.

Victim Of Heart Disease

Toronto, Ont.—Major General W. B. Lindsay, who commanded the Royal Canadian Engineers at the battle of Vimy Ridge in the Great War, was found dead at the Toronto Hunt Club, apparently a victim of heart disease.

GENERAL STRIKE THREATENED BY RAILWAY MEN

Ottawa, Ont.—A general strike of Canadian railway running trades loomed as a possibility following a deadlock reached by railway and union officials over the proposed 20 per cent wage reduction.

A meeting here with Hon. W. A. Gordon, Minister of Labor, as chairman, at which the proposed wage reduction was discussed by company officials and representatives of the men, ended in a deadlock. Union officers then took under advisement, asking their 24,000 members whether to call a general strike.

Five groups of railway workers were involved in the dispute. They were, firemen, conductors, trainmen and telegraphers. In the background lay the possibility of a strike by all organized railwaymen in Canada. On June 15, the Canadian National and Canadian Pacific railways served notice on all employees that within the five groups mentioned, they too must accept a 20 per cent reduction in basic rates. It was believed likely that any strike engineers by the five main groups would be joined by the others, including shopmen and trackmen.

The running trades were asked by the railway management to accept a 20 per cent reduction from basic rates. The men already have told the railways they will agree to continue the 10 per cent cut which has been in operation some months.

One of the arguments used by the men was that a 20 per cent reduction would mean Canadian railway men would be working at rates 17 1/2 per cent lower than those prevailing in the United States.

Because of the different constitution of the five unions represented at the conference, it was necessary to secure the authority to submit a strike-ballet in various ways. Immediate action was taken to secure the authority of the conference to secure this authority and the delegates said there would be no difficulty.

The engineers were represented at the conference by R. H. Cobb, Toronto; the firemen by H. L. Lynch, Ottawa; the conductors by Senator James Murdoch, Ottawa; conductors by Charles Montford, Montreal, and the telegraphers by W. H. Phillips, Winnipeg. In addition, 22 general chairmen from the Atlantic to the Pacific were present.

The Canadian Pacific was represented by Grant Hall, vice-president, George Hall, manager of the department of personnel. Representing the Canadian National were President S. J. Hungerford and Vice-President A. J. Hills.

Term Of Office Extended

Ottawa, Eng.—An announcement it made that Sir William Clark's term of office as high commissioner in Canada for the United Kingdom had been extended until September, 1934. Sir William was appointed to the post in 1928.

Fatally Injured

Rosier, Man.—Thodore Kliffinger, 26-year-old farmhand, was fatally injured when attacked by an infuriated bull on his employer's farm near here.

PUTTING THEIR HEADS TOGETHER

At a meeting of the Canadian National and Canadian Pacific railways, the two companies agreed to combine their efforts to secure the best possible terms for the proposed 20 per cent wage reduction.

The meeting was held at the Hotel Macdonald, Ottawa, and was attended by representatives of the two companies and the government.

The meeting was held at the Hotel Macdonald, Ottawa, and was attended by representatives of the two companies and the government.

Alberta Grasshopper Menace

Province Said To Be Facing A Serious Situation

Edmonton, Alberta.—As the result of a very serious situation which has arisen in the southern areas of this province in the past two weeks owing to the very hot, dry spell of weather, the provincial department of agriculture is facing the most serious grasshopper fight in the history of the province. Hon. George Headley, Minister of Agriculture, said recently.

The hoppers situation is more serious than that which developed in 1922 which held the previous records in such campaigns.

With plenty of poison bait materials on hand, the organization in charge of the campaign has the situation well in hand in spite of the large area affected, and thus far the actual damage by the hoppers is comparatively small.

Army Of Workers

Ten Thousand Men Now Employed In Government Campaign

Ottawa, Ont.—The number of single men now employed in government work throughout Canada has reached 10,000, according to figures of the Department of Labor. These include those working under the direction of the Department of National Defence. The number is steadily increasing as the various projects develop. The work of the national defence includes improvements of various militia camps, highway construction and landing fields for aeroplanes.

RAPID RISE IN PRICE OF WHEAT SAVES SITUATION

Gold Standard Debate

London, Eng.—A combination of words and what Prime Minister R. B. Bennett of Canada, called "an act of God"—a boom in the wheat market—saved the efforts to avoid international agreement for wheat acreage restriction from a breakdown.

The wheat situation seemed to be turning at last into a victory for the time being and it was agreed the conference of the four biggest wheat exporters—Canada, United States, Australia and Argentina—could well afford to wait for a brief space until the wheat situation is cleared up.

The blunt words were spoken early in the day, which seemed with dramatic effect to clear up the situation. The blunt words were spoken early in the day, which seemed with dramatic effect to clear up the situation.

Other delegates countered with the effect Australia was expected to line up sooner or later, and the sooner the better. The nearly 500,000, 600 bushel surplus of Canada and United States was mentioned, and it was intimated it has got to be disposed of somehow and if no agreement was reached there might be no other alternative than to put it on the market for what it will bring. The actual word "dump" was used by one of the delegates and it was said to have created a deep impression.

What Prime Minister Bennett called "an act of God, providence or mercy" made his force felt when Prime Minister Ramsay MacDonald, chairman of the world economic conference took a hand. Perturbed over the near breakdown, he called Premier Bennett, Henry Morgenthau, Sr., of the U.S., Mr. Bruce and Thomas Le Breton, of the Argentine, into conference.

In Canadian circles the view is taken there is no call for undue anxiety. While the abnormal surplus remains one of the great problems for action, crop reports coupled with the extraordinary rise in wheat prices, have introduced new factors which should be borne in mind.

When he received information concerning the rise in the price of wheat on world markets, presumably because of adverse crop reports, Mr. MacDonald expressed satisfaction with the progress of the negotiations.

"Experience has shown that a year's crop cannot be estimated accurately until July 15," one of those who attended the MacDonald meeting said. "Then it may not be necessary to take such drastic steps originally contemplated, and it is highly likely that a move will be made in that direction until about that time."

Threats about price devaluation which will follow if the Canadian and United States wheat surplus of 500,000 bushels is "dumped" on the world market acted to save from breakdown the wheat acreage restriction negotiations of the four principal wheat producing nations.

FRANCE MAY BE FORCED OFF THE GOLD STANDARD

Paris, France.—Financial experts are predicting that the battle of the franc is lost and it is only a question of time until France will be obliged to devalue.

Telephone conversations between Premier Edouard Deladier and Finance Minister Georges Bonnet, who is at the London conference, are said to have revealed that hope has been abandoned of Great Britain's stabilizing with Europe.

Economic forces either will push France off gold or compel the cheapening of the franc, probably a fourth or fifth, to meet U.S. dollar competition, financial experts said.

"It is wiser to act now," declared a source conversant with the views of the government, "but the public must be educated."

Nothing except the "miracle" of high dollar stabilization can save the franc, it was said, because diminution of the franc will benefit France as accelerated as tax receipts diminish and the budget deficit grows, compelling the government to inflate to get money, the treasury already is almost empty.

If parliament and the people were aware of the danger deluding France could be effected with less suffering. It was said, but the country is so thoroughly imbued with the idea of maintaining the gold standard that it is so safe that the government would be immediately overthrown if its value were changed now.

Gold Standard Debate

Rise In Commodity Prices Is More Encouraging Factor

London, Eng.—What the forces are gathering behind the scenes of the world economic conference for a renewed struggle over the gold standard, a new spirit is entering world trade.

Continued rise in commodity prices gives impetus to the belief the tide has turned at last. Dollar wheat at Chicago with reports of small crops, both in Canada and United States, eased the situation which a setback in negotiations to limit production had made increasingly difficult.

For some days increasing pressure has been brought to bear on the United Kingdom's delegation to link sterling with the gold standard and stabilize without the American dollar, which the United States flatly refuses to agree at this time for fear of the effects on their internal price-raising program.

The British have stoutly resisted this move, the effect Australian is expected to line up sooner or later, and the sooner the better. The nearly 500,000, 600 bushel surplus of Canada and United States was mentioned, and it was intimated it has got to be disposed of somehow and if no agreement was reached there might be no other alternative than to put it on the market for what it will bring. The actual word "dump" was used by one of the delegates and it was said to have created a deep impression.

What Prime Minister Bennett called "an act of God, providence or mercy" made his force felt when Prime Minister Ramsay MacDonald, chairman of the world economic conference took a hand. Perturbed over the near breakdown, he called Premier Bennett, Henry Morgenthau, Sr., of the U.S., Mr. Bruce and Thomas Le Breton, of the Argentine, into conference.

Threats about price devaluation which will follow if the Canadian and United States wheat surplus of 500,000 bushels is "dumped" on the world market acted to save from breakdown the wheat acreage restriction negotiations of the four principal wheat producing nations.

Mourn Treaty Of Versailles

Hitler Regime Responsible For Obscure Anniversary

Berlin, Germany.—All Germany went into mourning June 28 in protest against the treaty of Versailles, signed 14 years ago by representatives of the allied powers and Germany.

The new regime of Chancellor Adolf Hitler, which moved closer to complete domination of the national scene with the dissolution of the National party and its affiliates, is responsible for the first observance of the anniversary.

Flats were down at half mast from churches, public buildings and houses. The signing of the post-war treaty was the theme of school exercises. Thousands of Germans were planned. The Berlin Protestant cathedral announced a special prayer service on the theme, "God liberate us."

All newspapers devoted editorially to the pact, which provided for changes in Germany's boundaries on the south, north and east; for the ceding of Germany's overseas colonies to the principal allied power; and for the limiting of Germany's military, naval and air forces among other matters.

Science Invades The Laundry

National Research Council Solves
Routly Problems

Science has invaded the laundry. No more holes in the guest room sheets, no more raggedy towels, no more saw-wooded corners, no washed-out colors. The national research council has harnessed science to the laundry.

The Eastern Canadian Laundry Men's Association is to hold a convention in Toronto and will be given by the application of science to their laundry. They will receive \$100,000 a year from the nation's laundry bill.

Leaders in the industry some time ago told the national research council their troubles. Here a tablecloth came out of the laundry full of holes, there a bunch of colored towels came out with that washed-out complexion, stained shirt collars and cuffs refused to come clean except under drastic methods that would damage the fabric.

What could be done about it? The research council established a textile and laundry board. In it was found, not a modern Mrs. Gamp or even a laundry manager, but a scientist. Dr. O. M. M. Morgan.

In a miniature drying cabinet small squares of linen were hung surrounded by instruments and gadgets.

In all manufacturing plants sulphur dioxide from the smoking factory chimneys pollutes the air. Absorbed by wet fabrics, this gas is converted into sulphuric acid, and the acid rain washes down on earth those holes come in her good linen tablecloths and sheets.

Dr. Morgan's cabinet is treating the sulphur dioxide treatment to his little fabric squares and then he'll know just what does really happen.

The laundering of fabrics were found out far more quickly than steam and heat, and the laundries of Canada have for years been cutting this loss to a minimum.

One laundry refuses to believe the evidence. It has been washing clothes for years and years and their many customers had seldom complained. They did not feel called on to change. As a concession they agreed to make one improvement suggested by the laboratory. To their amazement their textile strength losses were cut in half. They not only put into effect all the other recommendations, but sent their own experts to Ottawa to learn more about laundry.

"Do they bring their practical problems to you?" Dr. Morgan, the young Ontario-born scientist who is doing these tests, was asked.

"Yes," he replied, "a well-known city claimed that a laundry had damaged a large quantity of table linen. Our tests showed the damage due to faulty weaving, and the linen manufacturer made a laundry washing machine to the club and the laundry's reputation was cleared."

Doctor Has New Idea

Suggests Skin Irritants Or Foods
May Cause Cries

An experiment to discover whether "sensitization" of the skin is a test to dust, medical drugs, or even the wrong kinds of food plays any part in producing psychopathic conditions that lead to crime is being made with 50 inmates of Sing Sing prison. Dr. V. C. Brahan, deputy commissioner of correction, relies on skin tests to show whether the individual is affected by certain kinds of dust, pollen, drugs, or foods to the extent that he may become "unstable." In this state he is restless, and in some cases may commit impulsive acts. Dr. Brahan has found.

King Must Give Approval

Variety artists who appear before the King and Queen are chosen at a secret meeting in London at which a provisional program for the command performance is drawn up. This is sent to the Lord Chamberlain, the Earl of Cromer, who in turn submits it to the King. Every item must have the approval of the King, and until this has been made known the names of the artists chosen are kept secret.

Decide Against Sweepstakes

The Newfoundland Government has decided against participating in sweepstakes for revenue-raising purposes. Several proposals submitted in the last few months have been rejected, according to a government announcement. The stand of the government is that promoters of sweepstakes must deal directly with the Lotteries Licensing Board.

Turkey has ordered \$5,000,000 worth of German railway material.

W. N. U. 2001

Hot Tuberculosis Treatment

Hot Baths and Electrical Treatment
Show Good Results

Possibility of the treatment of tuberculosis by use of hot baths and high frequency waves was presented before the American Sanatorium Association convention in Toronto, when Dr. E. S. Mariette, of Minneapolis, member of the committee on treatment, described experiments he had conducted in this field.

A majority of a number of patients who had undergone the hot bath or high frequency treatments over a period of several months had shown marked improvement, he said. Of seven who had taken hot baths over a month, six had shown X-ray improvement, in some cases marked, and the three who had been given high frequency treatments two had shown improvement. All of the patients had been in sanatoria for years without showing any improvement whatever.

"I am not advocating this as a desperate treatment," Dr. Mariette emphasized. "But I am offering it to you as an idea and I would like you to try it. Time alone will tell whether this is a step toward therapy tuberculosis, or that we are all crazy."

The paper was received as a presentation by the association. His experience, he explained, had been prompted by the noticeable relation between normal temperature of animals, fowl and men, and their respective susceptibility to human and bovine tuberculosis.

Seven patients were subjected to hot baths which raised their temperatures to 104-5 for an hour each day for 10 days, he said. For the next two weeks they underwent hot baths every other day. At the end of the period six showed improvements.

Automobile Accidents

Fewer Fatal Accidents In 1932. According To Statistics. There were 1,171 deaths from automobile accidents in Canada during 1932, as against 1,316 in 1931, says the annual report of the Dominion Bureau of Statistics.

The death rate from this cause was 10.6 per 100,000 population, as compared with 12.1 in the preceding year. Since the year 1926, the first year in which the vital statistics of all provinces of Canada were compiled on the same basis, 1932 was the first year to show any significant reduction in the number of deaths from automobile accidents. The years 1927, 1928 and 1929 each showed a marked increase over the preceding year, while the level reached in 1929 was approximately maintained in 1930 and 1931.

Reforestation Policy

Proposes Far Plan Covering Long
Period Of Years Advising Long
Period Of Years Advising Long

A policy of reforestation and utilization of certain forest products is advocated for Saskatchewan by Hon. J. F. Bryant, K.C., Minister of Public Works of the province. Definite proposals for reforestation covering a period of from 50 to 75 years are outlined by the Minister, who also stresses the feasibility of establishing a large croesowing plant at Prince Albert for the treatment of jack pine and lodge pole pine. Mr. Bryant suggests the adoption of a policy modeled after the English forestry plan, which would extend over a period of years, and that trees be planted in all areas suitable for their growth.

Prefer English Films

The Canadian people prefer English musical comedies to Hollywood ones and gangster films, says P. S. Bevell, Canadian representative of the British International Pictures, who declares further that improved photography, the English accent, and better acquaintance with British stars is creating a Canadian preference for English films.

World's Largest Libraries

The seven largest libraries in the world, according to numbers of volumes are: The Public Library of Congress; Library of Congress, Washington; Bibliothque Nationale, Paris; New York Public Library; British Museum; Berlin; and the Bodleian Library, Oxford.

Not Borealis

Refusing to acknowledge John Cabot, ancient explorer, as discoverer of North America or even this part of the continent, the city of Montreal has rejected the proposed inscription on a monument to the mariner the Italian colony of the city will present to Montreal.

Soviet shipments of gasoline from Black Sea ports in the first three months of this year totaled 3,385,000 barrels.

MEET "PETER" and "PUNCH" THE HORSE HEROES

Here we see "Peter" and "Punch," the two famous R.A.S.C. grey horses, as they appeared at Olympia, London, recently. These two horses took part in the retreat from Mons and were awarded the three medals of the Great War. Now, too old to work, they are semi-retired members of the Royal Army Service Corps at Aldershot, and are kept by officers and men out of their own pockets.

Spirit Of British People

Britain Farther Along The Road To
Normalcy Than Any Other
Country

Of all the nations that participated in the Great War, none had a greater load to carry both during and after the conflict than Great Britain. Then came the economic collapse to further test the framework and make enormous demands on people and Government. Today it seems to be the consensus of opinion that, despite the burden of defeat which weighs her down Britain is farther back along the road to normalcy than is any other country. Admittedly, she is fundamentally the strongest. Economists will not find the explanation of this in columns of figures and charts and graphs. The reason lies in the spirit of the British people.—Hamilton Spectator.

Careful Use Essential

Substance Used In Explosives and
Dyes Make Fat People

This. Dinitrophenol, a substance used in making explosives and dyes, also will make fat persons thin. Dr. M. L. Painter, medical professor from Stanford University, told the Pacific Division of the American Association for the Advancement of Science here.

But he warned women not to storm the drug stores, for improperly administered dinitrophenol in a short time will kill them with a fever of 110 to 115 degrees, in proper doses, though, he said, it melts fat as fast as it forms.

Lucky Parachute Jumper

James Morning, professional parachute jumper, of Lisle, New York State, narrowly escaped death three times in one week. In two jumps only an hour apart, he was rescued from the waters of Great South Bay by a police boat, and suffered painful injuries when his chute collapsed a hundred feet above the ground. The third time he landed on high tension wires, and was saved by firemen.

A man wrapped up in himself makes a very small package.

The Foreign Born

Making A Great Contribution To
Artistic Development Of
The West

While there is sometimes a tendency to criticize the central Europeans in Canada, there can be no doubt that they are making a great contribution to the artistic development of the west, declared Prof. A. Collingwood of the University of Saskatchewan, before sailing for England on the liner Calgarie.

Professor Collingwood was invited to occupy the newly created chair of music at the University of Saskatchewan a few years ago after he had acted as adjudicator at musical festivals in western Canada.

"Today, I am an ultra Canadian," he continued, "I am intensely proud of the wonderful development in music in western Canada. We have fully equipped orchestras in Saskatoon, Regina, Calgary, Edmonton and, of course, in Vancouver. The general standard of music in the west is comparable with that produced anywhere in the world."

Life On Board Old Ship

Eighty Men From Crew Of Old
Frigate, Recently Restored

No stranger crew sails the Seven Seas today than that of the U.S. Constitution. Eighty men went aboard the restored frigate in June, 1931, to undertake an extensive voyage to them. Everything about "Old Ronan" is the same today as in 1812, including the routine of the crew. The work is all done by hand, even the decks are scrubbed with water pumped from the sea. The only heat is in the galley. Yet the crew, after nearly two years, reported almost intact. Quite a record, in view of the pleasant duty to be had on the up-to-date man-of-war.—Boston Post.

The fresh-water eels of British rivers are born in the depths of the Atlantic off Bermuda. After the eggs are hatched it takes the young eels three years to cross the Atlantic to Britain.

Advertise it, or you may have to keep it.

Modern Science In Cooking

Trained Workers Prepare Standardized
Recipes For Best Results

One of the big contributions the scientists in home economics laboratories have been making to the home-maker is in the standardization of recipes.

Believing that a great deal of the uncertainty in cooking was due to uncertain measurements, trained people have been working with this problem. Now the accepted standard is that a cup means exactly two-fifths of a pint (eight ounces). There are 16 tablespoons in a cup and three teaspoons in a tablespoon.

Trained workers have also been devising exactly how much of each ingredient should go into a recipe to give not only a possible result but a first-class one.

The most recent efforts have been directed toward the combining of ingredients. It is hard to know when to beat and when to stir and how long, and presently people are performing a large number of cookery tasks. Modern science is standardizing these important procedures.

Some Weather Indicators

Several Ways To Determine Whether
Rain Is Coming

Look at your bedroom windows and, if there is no mistiness on the glass in the early morning, rain is extremely unlikely. On the other hand, when the windows are moist with damp, the weather is not likely to be so fine.

Then examine the cake of soap, for this will give a useful indication. When the cake is dry expect a fair day, but if the cake is soft and wet, rain is sure to come. When you come down to breakfast see what happens when you put a lump of butter in your tea or coffee. If the air bubbles stay long on the surface, distrust the weather, for that means that there is a good deal of moisture in the air and that, as well as the atmospheric pressure is low, a condition associated with unsettled weather. On the other hand, if the bubbles disappear, you can tell that the air is very dry and that there is a high pressure system in existence, both of which indicate fine weather.

More Than A Coincidence

Birth Of Twins Often In Three
Generations Of Ontario Family

Once in a family might be just an occurrence, twice might be a coincidence, but when for a third time the same family parents, after having seven single children, become parents of twins, it has been said, and heretofore is inexplicably tied together.

Mr. and Mrs. Amos Weber, Jr., of Waterloo, Ont., recently became the parents of twin sons. These came after seven children had been born to the family.

Years ago Mr. and Mrs. Amos Weber, Sr., had seven children and were then presented with twins, one of whom being named the Junior.

And on top of this Mrs. Weber, Jr.'s parents, Mr. and Mrs. Donald Martin, of Elmira, had seven children and twins.

It must be a record.

Decide For Yourself

A surgeon, an architect, and a politician disputed which belonged to the oldest profession.

The surgeon claimed the distinction because Eve was made from Adam's rib. That, he contended, was surgery. "But," said the architect, "before the advent of Adam order was made out of chaos. That was architecture."

"Admitted," said the politician, "but who created the chaos?"

Mysterious Expedition

Capt. Bob Bartlett, explorer, has a secret, mysterious with adventure in the land where the north wind comes from. Leaving for the Arctic in his famous schooner "Effe" M. Morris, he refused to say exactly where his party is going. "We hope to penetrate an area which virtually nothing is known," he said mysteriously.

Tiger Preferred

The big game hunter was telling his stay-at-home wife all about his encounter with the Bengal tiger and how he had finally shot it. "Yes," he went up. "It was a case of the tiger or me."

"I'm so glad it was the tiger, dear," she said sweetly, "otherwise we wouldn't have this lovely rug."

Norway's whalers produced 1,280,000 barrels of whale oil in the season just closed.

Seaside girls of England are writing Japanese coolies hats this season.

Lord Strathcona's Home

Is Now Haven For Aged Ladies In
Reformed Circumstances

On the floor of one of the most stately mansions in Montreal there is a simple brass plate which bears the inscription "My Mother's Home." It is a tribute to a Canadian mother, who has long since passed away, by a son who has attained riches and power. Now the accepted standard is that a cup means exactly two-fifths of a pint (eight ounces). There are 16 tablespoons in a cup and three teaspoons in a tablespoon.

Trained workers have also been devising exactly how much of each ingredient should go into a recipe to give not only a possible result but a first-class one. The most recent efforts have been directed toward the combining of ingredients. It is hard to know when to beat and when to stir and how long, and presently people are performing a large number of cookery tasks. Modern science is standardizing these important procedures.

Praise For Canadians

Earl Of Bessborough Has High
Opinion Of People's Courage

"I can only see Canada as a land of depression." His Excellency the Earl of Bessborough told an audience of 1,000 people at the Hotel St. James, Ottawa, last night, when he was in the city on his way to the Farm and Training School at Shawbridge, Que. "Having seen the Dominion during this period," the Governor General said, "I have been able to learn to appreciate Canadians far more than I would have been able to do in a time of general prosperity. There is nothing more encouraging, hopeful, or cheering than the calm, steady way Canadians have pursued their daily tasks during this difficult period with a supreme faith in the destiny of their country."

Should Have Objected

Mr. Richards was persuaded to buy a parrot that could jabber in several languages. He ordered it sent home.

The same day his wife ordered a chicken for dinner. On leaving she said to the cook, "Mary, there's a parrot in the kitchen. It's just as good as dead. It can't talk. It's cooked for Mr. Richards when he gets home."

The parrot arrived first, and Mary followed with instructions. Dinner was served.

"What's this?" exclaimed Mr. Richards.

"Mary told him."

"But, for goodness sake, Mary," he said, "this is awful! That bird could speak in three languages! 'Then why the dickens didn't he say nothing?' asked Mary."

Had Nothing On Him

A woman hired a taxicab. The door of the cab was hardly closed before the engine started with a jerk, and the cab began to race madly along, narrowly missing lamp posts, tramcars, policemen, etc. Becoming frightened, the woman remonstrated with the chauffeur.

"Please be careful. This is the first time I ever rode in a taxi."

"This is all right, madam. This is the first time I ever drove one."

CHAPTER XII—Continued

"But sir," he led on, "when I came back from the Alooska, patrol, he wouldn't co-operate with me then. He didn't seem much interested, I don't think, in getting those bandits."

"What, no interest?"
"He seemed interested,"
"He seemed with a great show of astonishment. 'Sir, I wanted him to make a patrol to the Inconnu River. But he was in a temper and wouldn't even listen to my suggestion.'"

A wild elation surged through Alan. One more step and Haskell would be doomed! He fought down that elation and fledged uneasily in his chair.

Williamson bore down on him. "Baker, answer that charge! Haskell suggested a patrol to the Inconnu. In my opinion that was a splendid suggestion. It was almost the only hope of capturing those criminals. You wouldn't listen to him. How dare you say a man you were forced to buy out?"

"He didn't... It wasn't him that made that suggestion," Alan stammered weakly. "I think I believe that made that suggestion myself. But he wouldn't let me go."

"That's a lie," Haskell pounced upon him. "I suggested it. I begged him to make that patrol."

Alan looked at Haskell. "You suggested that? Inconnu patrol? It was your idea?"

Haskell nodded. "I did. Whipple can witness it. He was smiling open all the time."

As Alan's hesitation dropped away from him. There was no longer need to dissimulate. He turned to Williamson. "You heard him. I believe what he said. He told you he suggested that Inconnu trip. He just repeated it and he said Whipple was witness. Don't let him take you out of now."

"I don't have to back out of anything," Haskell snarled. He was staring in sudden uneasiness at Baker.

"Yes, I heard him," Williamson answered. "What about it?"

Alan rose slowly to his feet, pulling himself up to his full lanky and powerful height. In that moment when he realized Haskell was caught in the deadly trap, his mind whirled back to Joyce's home on the Alooska, to Baker's room where the men had come through weary hours of doubt and pain, and where he and she had carefully plotted this trap. He felt a tremendous trust gratified to find this stratagem was hers more than his; her quick brain had been the first to see its crushing possibilities.

"Incongruity," you say you asked me to lead that Inconnu detail, you say you suggested it. You say it occurred to you that the bandits would follow that river. I say you are a liar!" propose to prove you're a liar."

"You heard him," Williamson answered. "What about it?"

Alan rose slowly to his feet, pulling himself up to his full lanky and powerful height. In that moment when he realized Haskell was caught in the deadly trap, his mind whirled back to Joyce's home on the Alooska, to Baker's room where the men had come through weary hours of doubt and pain, and where he and she had carefully plotted this trap. He felt a tremendous trust gratified to find this stratagem was hers more than his; her quick brain had been the first to see its crushing possibilities.

"Incongruity," you say you asked me to lead that Inconnu detail, you say you suggested it. You say it occurred to you that the bandits would follow that river. I say you are a liar!" propose to prove you're a liar."

"You heard him," Williamson answered. "What about it?"

Alan rose slowly to his feet, pulling himself up to his full lanky and powerful height. In that moment when he realized Haskell was caught in the deadly trap, his mind whirled back to Joyce's home on the Alooska, to Baker's room where the men had come through weary hours of doubt and pain, and where he and she had carefully plotted this trap. He felt a tremendous trust gratified to find this stratagem was hers more than his; her quick brain had been the first to see its crushing possibilities.

"Incongruity," you say you asked me to lead that Inconnu detail, you say you suggested it. You say it occurred to you that the bandits would follow that river. I say you are a liar!" propose to prove you're a liar."

"You heard him," Williamson answered. "What about it?"

Alan rose slowly to his feet, pulling himself up to his full lanky and powerful height. In that moment when he realized Haskell was caught in the deadly trap, his mind whirled back to Joyce's home on the Alooska, to Baker's room where the men had come through weary hours of doubt and pain, and where he and she had carefully plotted this trap. He felt a tremendous trust gratified to find this stratagem was hers more than his; her quick brain had been the first to see its crushing possibilities.

He paused a moment, then raised his right hand and pointed at that wall chart behind Haskell's desk. "The Inconnu River is not shown on that map of yours, inspector. You tried to find out from that Indian, Little Otter, where the river is. You didn't know. You don't know now. How could you suggest sending a patrol to a river when you haven't the slightest knowledge of its location? Step up there to that chart, and let me show you the Inconnu!"

Haskell sprang to his feet, snarling at Alan. "I don't take orders from you! He's fighting like a trapped wolf. His panic, his livid face, he's betrayed him."

Then couldn't it be ordered, "Show me where the Inconnu is!"

Haskell did not stir. His impregnable defense had crumbled in one spot; the sea was rushing in upon him.

He heard Williamson thundering: "I say, answer Baker's question! How could you suggest a patrol to a river that you know nothing about?"

Haskell did not answer. Caught, trapped... He had gone too far, he had overplayed... He heard Larry Young's savage mocking laugh; heard Bill Hardcock chuckling.

Across the desk he saw Alan Baker's face in a sort of haze, and he saw him, not mocking, but hard, pitiless.

"The man had beaten him, had taken away the girl he loved—this woman whom he hated so fiercely that once he had tried to kill him."

Out of the haze he heard Baker's voice, "Liar! Smoothie!"... Some-thing snapped within him, and his last vestige of self-control was swept away. A maddened anger shook him, blinded him.

He tried to stifle Alan's taunt, and he swung and smashed a fist against that hated face, as though trying to blot it out.

When the stunned Baker for a moment. He stepped back. Williamson tried to interpose. Bill sprang up and leaped across the room to jump between them. But Haskell did not swing again. Alan flung up his left arm to protect himself. A grimace of pain flared across his face as he was struck by the blow.

He did not move. He did not step away that time... For an instant his eyes measured distance. His right arm was back, swung and his hand fast caught Haskell under the jaw, a single smashing blow that sent him and sent him reeling against the wall.

When Bill and Pedesant helped Haskell to his chair and sat down, groggy and white of face, Williamson bade the two:

"Take Haskell Young and get him out of here. I want you to go."

Vaguely Haskell realized that the superintendent was ordering that men be taken out of the net witness the humiliation of an officer. He had lost. The avalanche had crashed upon him. Baker had come triumphant through this hour.

But in those moments of his crushing defeat, while Williamson was trying to lead the men out of the cabin, Haskell felt the first small breath of a strange relief, like a cool wind across his face. He had become involved in it; he had been sucked deeper and deeper into a morass of falsehoods and perjury. He was free of all that now. In these last weeks there had been time when he looked upon Larry Young, when he thought of Baker's great-hearted adventure, when the news came of Dave MacMillan's suicide—that his conscience had revolted and he had loathed himself. He felt as though by making a clean breast of everything to Williamson, he would be coming out of a dark and noxious place into the sun and air.

He felt the old sickening madness to watch Elizabeth Spaulding waded to and fro, but rose to torture him.

CHAPTER XIII
By the Lightning Flash

At Alan's cabin late that evening Bill was sitting on the edge of the bed, head in hands, plunged into dejected thoughts. He was in such a blue funk that he neither heard nor cared what Alan and Buzzard were talking about.

An hour ago, by sheer accident, he had discovered that he himself was now officially in charge here at En-durance. Walking past Haskell's cabin he saw the twilight had caught him in such angry sentences from Williamson.

"If I had the entire say now, Haskell, I'd see you sent out of the hotel faster than you came in. You're suspended; Hardcock will be given command here till I see what Baker is going to do. You don't deserve a chance to walk straight, but I'll give you one rather than kick up a row over you. There's a rock detachment down on the Border that's about your lot. I'm going to transfer you there, and I'll try not to laugh when I see men saluting you."

To be in command of the detachment was small solace to Bill. It simply meant more wear and tear, his ability, without Alan's judgment and leadership to lean on.

In the heart of light streaming from the cabin door a girl's figure appeared. Bill straightened up suddenly, recognizing Elizabeth. Always a bit of a supercilious girl, she had no doubt to linger and find out her trouble. Nudging Buzzard, he whispered:

"She wants to talk with Alan. We'd better get out."

As Elizabeth came across to the library book in the full candle glow, Alan saw she was angry, and instantly guessed the cause of it. She had heard... She was going to ring reproaches at him, perhaps throw an ultimatum into his face.

With no word about his long patrol or the wounds he had brought away from the attack went on his face.

"It's true that I've heard about that reward money? You're not going to accept any of it?"

Alan was shocked that in his first breath he should speak of money. He said rather tersely:

"That's not altogether true. I'm taking an interest in the MacMillan trading post for Larry, and I have to pay for those things Buzzard and I stole in Edmonton. But I'm not keeping any of it otherwise."

"Are you crazy—to throw away more than you've made in all the years you've been stationed here in this backwater? Why did you go out that patrol and waste all these weeks?"

"Good Lord, have you been thinking I'd go for the money? It's the only thing in the world you ever think about!" He tried to curb his anger and speak quietly. "Elizabeth, you're a little out of your mind. He gave his very life, because—"

"... You may not understand that. God knows it wasn't for money."

"Then you intend to throw away thousands of dollars?"

"Yes, I intend to do it like that. Yes, I couldn't associate with myself if I'd accepted that rent of it."

In silence they looked at one another. Alan felt the need of speaking. Alan felt, unyielding. After a moment, realizing she had run up against granite in Alan Baker, he said the question, she turned to another.

"There's something else I want an understanding about. What Mr. Drummond told me you intend to take care of Jim Montgomery's girl. What makes you feel you're responsible? Why on earth...? Just because you were acquainted with that child's father?"

Alan sharply interrupted her. "Elizabeth, let me point out something to you. It may be cruel and unkind, but it's true. It's got to be said. When Curt was taken, it felt to me to look out for you. You were a grown woman; you had chances of making a good thing of it. I didn't want to look out for you. You were a grown woman; I assumed responsibility. Please, now. I'm not throwing it up to you; I did it freely and would've done more if I'd been able."

(To Be Continued.)

Wood Sugar

Production on Large Scale in Sweden Is Planned

Raw sugar made from wood has been planned for production on a large scale in Sweden. This sugar, however, is not for human consumption, but for use as feed for cattle, for alcohol distillation and also as a material for making yeast.

This wood sugar is a timely source of alcohol, as Swedish laws make it compulsory that all imported spirits be used in motor cars be mixed with alcohol in the proportion of three to one. A new discovery method is said to make it possible to extract about 60 pounds of sugar from 100 pounds of wood. Swedish authorities estimate one million long tons of this sugar can be made yearly in that country.

Playing Safe

"What is your opinion of the tariff?"

"It's a great question," replied Sen-ator Duggan, "on which I don't permit myself personal views. My public opinions are regulated largely by the lines of business in which my constituents are engaged."

New trains to run 110 miles an hour are being planned for the United States railroads. That should keep up the "Let's beat it to the crossing" fans.

A new process of extracting copper from its ores by means of a line has been developed by chemists in Chile.

The Hardest thing in the kitchen is HAND-ROLL.

Oxford Group Platform

Independent Candidate Announces Policy Of Absolute Honesty

High Savage, independent candidate for the legislature in Cowichan-Newton, B.C., announced at the Oxford Group platform of "absolute honesty, absolute purity, absolute usefulness, absolute love."

Mr. Savage is publisher of the Cowichan leader and a widely known newspaperman, and a supporter of the Oxford group movement. In his speech he told the conference of "absolute honesty, absolute purity, absolute usefulness, absolute love."

"If you want to put me in I have got to know what sort of man I am, and I have changed. I have discovered I know—that the only remedy for this depression will come by the individual altering his views. It is no use trying to govern the universe unless we change ourselves."

"My paper, by its motto, is pledged to religion, liberty and law. If you want to vote for me, you must first fight this accused patronage that makes even the poor devil on the road today have to be the foreman for fear of his job."

Britain Buys Empire Wheat

Imports Into United Kingdom Show Heavy Increase

During the 12 months ending May, compared with the previous 12 months, the imports of wheat into the United Kingdom from empire countries showed an increase of about 52 per cent, says a report of the Dominion Bureau of Statistics.

The increase from Canada was about 90 per cent, and from Australia 17 per cent. Of the total imports of wheat into the United Kingdom for 12 months ending April, Canada supplied 48 per cent, and Australia 25.37 per cent, while for the same period in 1932, Canada furnished 44.88 per cent, and Australia 16 per cent.

An Aerial Train

Three Motorless Planes Successfully Used By The Montreal Craft

Three motorless aeroplanes were hauled about the sky at Los Angeles by a fourth plane, acting as "locomotive."

This is understood to be the first aerial train in history in the United States in which as many as three motorless aeroplanes have been simultaneously by one motor craft.

The demonstration was reported as a step toward realization of the dream of airmen—that of operating aerial express trains with only the leading ship powered and the rest towed so they can be cut loose from the train any landing field along a transport route.

Well-Known Artist

Horne Russell, Portrait Painter, Dies In New Brunswick

George Horne Russell, R.C.A., Montreal painter well known to the Dominion for his portrait work and views of maritime province shore and harbor scenes, is dead at St. Stephen, N.B. In 1899, after a painting trip in the Canadian Rockies, Mr. Russell was elected an associate of the Royal Canadian Academy of Arts.

A full member in 1919, he presided over the academy from 1922 to 1926.

Pretty Teacher (having written a poem on the blackboard: "It's a month since I been to the cinema") in "Willie, what must I do to correct that?"

Willie: "Tell your young man, miss."

The government of Siam is boosting railway construction.

"NOW FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound That's what hundreds of women say. It stimulates the nerves... makes you feel better... sleep better... relieves periodic headache and dizziness... makes you feel like a new woman.

It's not as well as you are, give this medicine a chance to help you. Get a bottle from your druggist today.

Food From Many Countries

Delegates To World Economic Conference Have Special Restaurant

Between the plenary session speeches and the committee meetings, the delegates to the Economic Conference are gathered in a special restaurant stocked with nearly all foods and liquors consumed in any part of the world.

There is much fraternizing as representatives of the various countries sample each other's favorite national dishes—caviar, sandwiches and vodka. Chinese chicken, five kinds of German sausages, meat sauce from Japan and so on.

Beverages available run the entire range of wines, beer, whiskies, gin, brandies and liqueurs from a dozen countries, including Anzac from Palestine, which bar attendants describe as being "popular among those persons who try anything once."

One waitress boasts of an ability to say "what's your order?" in three languages.

The delegates ride from their hotels to the Conference hall in big cars decorated with small national flags.

THE RHYMING OPTIMIST
By ALICE MICHAELS

SANCTUARY

To cross your threshold is to gain A mood that waits me only there. For in that chamber I attain To peace, that tells me which I follow.

How sweet, to know that where you go No evil thing can find its way; That in your presence all is well, Serene and beautiful as day.

To cross your threshold is to find How futile are temptations ways; Your look, compassionate and kind, Can teach with light the darkest days.

To cross your threshold is to leave Outside all bitterness and care; To cross ground how once gave grief. What troubles can assail one there?

Your faith and trust God's own As strongly shining as the sun; With no dropped stitch of doubt To vex the heart, no doubt to vex the sun.

Grow Red Cotton

Cotton Patches In Southern States Have Turned Complexion

The "red" description of "fields of snowy white" does not hold good now more for cotton patches of south Mississippi have gone red and changed the complexion of the land.

Planters are growing red cotton now because some experts say the red variety has a longer staple and produces a better better than its green cousin.

The stalks and leaves are a deep red color, the fields look like lakes of blood. The blooms are pink and the cotton itself, of course, is white. The contrast is startling.

Will Direct War Library

Ex-President Hoover To Be Librarian At Stanford University

Herbert Hoover is to become a librarian. The Stanford University Library building is being remodeled to provide Mr. Hoover an office from which he will direct the Hoover War Library.

Additional space in the archives also will be provided to house additional material brought here from Washington by the former President.

The Hoover library is the largest of its kind. Many documents filed there dealing with secret diplomatic negotiations preceding the World War and after it never have been made public.

Millions In Charity

The millions of the late Horace H. Hachman, 73, who made his fortune as one of the original stockholders in the Ford Motor Co., are going to charity.

Hachman, at 65, borrowed \$50,000 to invest in stock of the Ford Company, and 16 years later sold out to the Fords for \$12,500,000.

Followed Instructions

The roadmaster, riding along on the train, sent a telegram to the section foreman which read as follows: "Grass and weed accumulated around bridge 365-M. Burn."

In a short time the roadmaster received a telegram from the section foreman: "Bridge 365-M. burned."

A bill in the British House of Commons proposes Easing for those cruel to animals.

Chem, England, recently held its 30th annual fair.

SUNBURN
PREVENTED BY MECCA OINTMENT

Excessive Sunburn is both painful and dangerous. It causes blisters, and sometimes, if severe, or if left untreated, it may lead to skin cancer. Mecca Ointment is the only ointment that prevents sunburn. It is made of pure olive oil and is completely harmless. It is sold in all drug stores for 10¢ a tin.

Little Helps For This Week

"Thou shalt rejoice before the Lord thy God in all that thou puttest thy hands to do."—Deuteronomy 12: 18.

"Be ye thankful in all things." —Colossians 3:15.

If any one would tell you the shortest and surest way to all happiness and all good things, he must tell you to make it a rule to yourself to thank and praise God for everything that happens to you. For God will do whatever seeming calamity happens to you, if you thank God for it. You may turn it into a blessing. Could you therefore work miracles you could not do more for yourself than by this thankful spirit, for he heals with a word and turns all it touches into happiness.—William Law.

Fear Complex Is Bad

Demand Steps When People Are Afraid To Spend

With one-fifth of our working population unemployed, it is no longer possible to believe that money is part of the natural order of things. The result is that fear has become the dominant emotion of contemporary America.

Employees today are satisfied to keep what they have; they are grateful for very little. The complex is bad for everyone. It degrades the employee and makes him an insensate automaton. It kills both ambition and desire. It debases standards of living. And from the employee's point of view it is equally disastrous. Where there is no desire, there is no demand. People who desire nothing buy nothing.—Atlantic Monthly.

Greater Business Activity

Bank Debts In May Reach Highest Point Since 1929

Reflecting greater speculative and business activity, financial transfers in the form of bank debts in May reached the highest point since November, 1931.

The May figures stood at \$2,649,000 compared with \$1,876,000 in the preceding month, a gain of 29 per cent after seasonal adjustment.

Gains were recorded in Regina, Saskatoon, Winnipeg, and in addition to the marked increase in Winnipeg. The net result in the prairie provinces was a gain of 65.2 per cent. The gain in British Columbia was 0.7 per cent. Vancouver showed an increase of 48 per cent.

Left Small Estate

Mrs. Mary Ellen Smith, former British Columbia cabinet minister, the first woman in the British Empire to hold such a position, and one of whose work was written into social legislation in this province, left a gross estate of some \$500 for her family by an application in supreme court for probate. The net is \$330. Mrs. Smith died on May 3.

A Triple Tragedy

"Goodness gracious!" exclaimed his wife when she saw him, "and what have you been at now, my dear?"

Pat groaned dismally. "O've had me nose broken in three places," he replied unapologetically.

"Well," said his wife fiercely, "perhaps that'll larn ye to keep out of their places!"

Austria's drive against foreign aid is helping its coal mines.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver

—No Calomel necessary

For you to feel healthy and happy, your liver must be in good condition. If it is not, you will feel tired, nervous, and generally unwell. You will have a headache, and your stomach will be out of order. You will have a bitter taste in your mouth, and you will feel generally unwell.

How can you expect to clear up a situation like this? You must get your liver into good condition. You must get your liver into good condition. You must get your liver into good condition.

You can get your liver into good condition by taking a course of treatment. You can get your liver into good condition by taking a course of treatment. You can get your liver into good condition by taking a course of treatment.

You can get your liver into good condition by taking a course of treatment. You can get your liver into good condition by taking a course of treatment. You can get your liver into good condition by taking a course of treatment.

The Oyen News

About Town and Country

C.C.F. rally under auspices of Progress U.F.A. Local, No. 1885, will be held in Oyen, on Wednesday, July 12, commencing at 1 o'clock p.m. at the fair grounds. Ball games, sports and speakers. William Irvine will speak at night in Oyen theatre, followed by a grand dance.

Mr. and Mrs. H. Hancock and two children of Edmonton, who have been visiting Mr. and Mrs. J. C. Desso over the week-end, left yesterday morning to return home.

Mr. R. J. Scott and daughter Beryl left last Saturday for Edmonton, where Mr. Scott will be engaged for the next three or four weeks, marking examination papers.

Mr. and Mrs. J. W. Robinson left the fore part of last week for a visit to Calgary.

Next Sunday an Anglican Church service will be held at Lovers Beach at 7 o'clock in the evening, weather permitting. If the weather is not favorable, service will be held in Oyen at 3 o'clock in the afternoon.

Mr. and Mrs. Robert Burns returned to Oyen last Thursday after spending a week at Lethbridge. They were accompanied on the return trip to Oyen by Miss Dorothy Scott.

Mr. and Mrs. A. R. Kerr, who have been spending a vacation in Ontario, returned home Tuesday morning.

Mr. and Mrs. J. R. Martin and daughter returned to Oyen yesterday after spending the week-end at Eaton's, and left today for Camrose where they will spend a holiday.

Mr. Harry Austen, who has been in Calgary for the last four weeks, returned to Oyen today.

Mr. Thos. Lees and Mr. James Lees who were business visitors in Calgary the fore part of this week, returned home today.

An account of the sports to-day will appear in the next issue of the News.

Tree Planting Car to Visit Oyen

The Canadian Forestry Association's Tree Planting Car will be in Oyen, on Friday, July 7. There will be an afternoon meeting at 3 o'clock and a moving picture lecture in the evening at 8 o'clock. No admission charge. The car will visit Excel on Saturday, July 8.

Look at your Address Label!

Excel Items

June 30, a bright summer day, saw the closing of all the surrounding schools, with a picnic. Excel school celebrated the day with a district gathering, sports and races. Miss Francis MacDonald, teacher, left on Sunday for her home in Mirror, Alta.

Farming Valley, Webster and Longdale schools held a joint picnic at Longdale school. Softball games were the main events of the day. Longdale school being the winners.

Miss Freda Swallow left that night for her home in Rowley.

Mr. Charles Campbell Webster, teacher, is visiting in the district.

Lawndale and North Excel schools also held a joint picnic. North Excel won the ball game of the day. Races were staged for the children, and a most enjoyable afternoon was brought to a close by a picnic supper.

The Misses Mabel Hole and Estelle Stewart, teachers, left for their homes in Medicine Hat and Nelson, B. C. respectively.

Dominion Day was celebrated in this district by a community picnic sponsored by Excel U.F.A. at the home of Mr. and Mrs. C. A. Bishop. About one hundred sat down to a picnic supper following an afternoon of softball and horse shoe playing. The next gathering will be the United Farm Women's picnic on July 18 in J. R. Anderson's grove at which, everyone will be welcome.

ANNOUNCEMENT

P. M. Marquardsen

Teacher of Piano-forte and Violin
Graduate of the Royal Conservatory of Music, Copenhagen.

Will be in Oyen, on Friday afternoon, July 7, to arrange classes. If a sufficient number of pupils desire to take lessons, regular weekly classes will be started. All interested are invited to communicate with Mr. Marquardsen, care of Oyen News.

Reduced Rates

Consolidating Tax Arrears

(Continued from page 1)
will be pro-rated among the various taxing authorities involved. The new act provides also for certain discounts on the payments of the instalments of arrears, as follows: For arrears of six years and more 25 per cent, arrears of five years, 22 per cent, of four years 14 per cent, of three years 14 per cent, and of two years nine per cent. These discounts will be computed, not on the total amount of the consolidation, but separately on each class of tax involved. That is, if the portion of the consolidated amount which is due on supplementary revenue is in arrears for six years, then the 25 per cent discount applies, but if that portion of the total which applies to another class of tax is in arrears for only four years, then it would receive only 18 per cent discount, and so forth. The act also assures those whose property is at present under the tax recovery act, by permitting them also to make an agreement to pay up arrears under the new act, and on completion of all the requirements of the agreement, regain title to their land. This applies to owners of two acres and more. A special additional discount of four per cent is allowed those who can pay the entire consolidated amount in one payment, this discount being computed on the net amount of arrears due, after the other discounts have been deducted.

Shorthorn Field Day at Lacombe Monday, July 17

On Monday, July 17, under the auspices of the Alberta Shorthorn Breeders' Association, a field day will be held at the Dominion Experimental Station at Lacombe.

Hon. Robert Weir, Minister of Agriculture and Mr. Barton, recently appointed Deputy Minister of Agriculture for Canada will be visitors at the Experimental Station, and Mr. Newman, Dominion Cerealist, and Mr. Muir, Dominion Animal Husbandman, will also be present, and will be able to give much valuable information to anyone attending the Field Day.

Visitors are invited to come early and inspect the hedges, trees, shrubs and flowers at the station, before lunch. Bring your baskets for a picnic lunch. Coffee, cream and sugar will be provided. The programme will commence at 1:30, and will consist of addresses by Hon. Robert Weir and a few other prominent men, followed by a parade and inspection of Clydesdales and Shorthorns at the station, and a drive around the farm to inspect the field crops. Later, a number of Shorthorns will be judged and fully discussed, and this should prove a very interesting feature of the day.

Here and There

Gasoline sold in Canada during 1932, according to figures compiled by the Dominion Bureau of Statistics, amounted to 563,452,000 gallons. Nearly half the total was consumed in the Province of Ontario.

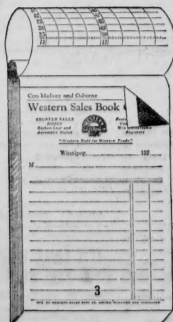

The recent Canadian census reveals that of the population of Canada fifty-two per cent. are of British origin, twenty-eight per cent. French origin; seventeen point five per cent. all other European races, and about four-fifths of one per cent. Asiatic.

The Saskatchewan Department of Natural Resources will liberate about 2,000 nine-week-old pheasants throughout the province of Saskatchewan during the coming summer. The birds are being held in captivity at Moose Jaw prior to liberation.

Despite a somewhat later season this year, crop conditions throughout the Prairie Provinces provide cause for optimism in the opinion of J. M. McKay, general agricultural agent, Canadian Pacific Railway. He based his view on improved moisture conditions and generous growth everywhere, which at some points was the best since 1925.

Completing a seasonally successful visit to Canada and the United States having several months the Oxford Group sailed recently aboard the Empress of Australia for England under the leadership of Rev. H. Allen Viner. Their Canadian visit terminated with a house party at the Chateau Frontenac at which 150 members were present.
